

# General Assembly

Distr.: General  
9 June 2017

Original: English

---

## Seventy-second session

Item 136 of the preliminary list\*

**Proposed programme budget for the biennium 2018-2019**

### **Implementation of projects financed from the Development Account: tenth progress report**

#### **Report of the Secretary-General**

#### *Summary*

The Development Account is a capacity development programme of the United Nations Secretariat aimed at enhancing capacities of developing countries in the priority areas of the 2030 Agenda for Sustainable Development.

The present report is submitted pursuant to General Assembly resolution [56/237](#), in which the Assembly decided to keep the implementation of the Development Account under review. It provides information on the implementation of projects funded from the Account since the submission of the ninth progress report ([A/70/97](#)) as well as updates on the management of the Account.

---

\* [A/72/50](#).

## I. Introduction

1. The purpose of the present report is to update Member States on the performance and management of the Development Account since the issuance of the ninth progress report (A/70/97). The mandate of the report is contained in General Assembly resolution 56/237, in which the Assembly reiterated its decision to continue to keep the implementation of the Account under review. The Advisory Committee on Administrative and Budgetary Questions<sup>1</sup> subsequently recommended that the report be submitted in the context of the presentation of the proposed programme budget for the biennium concerned. All previous progress reports, as well as details on individual projects, are available from the Development Account website ([www.un.org/development/desa/da](http://www.un.org/development/desa/da)).

2. The Development Account was established by the General Assembly in its resolution 52/12 B as a mechanism to fund capacity development projects of the economic and social entities of the United Nations Secretariat: Department of Economic and Social Affairs, Economic Commission for Africa (ECA), Economic Commission for Europe (ECE), Economic and Social Commission for Asia and the Pacific (ESCAP), Economic and Social Commission for Western Asia (ESCWA), Economic Commission for Latin America and the Caribbean (ECLAC), United Nations Conference on Trade and Development (UNCTAD), United Nations Environment Programme (UNEP), United Nations Human Settlements Programme (UN-Habitat) and United Nations Office on Drugs and Crime (UNODC).

3. Since the launch of the Development Account in 1997, 358 projects have been approved, of which 102 projects are currently ongoing (ninth and tenth tranches). In addition, 46 new projects under the eleventh tranche are being presented to the General Assembly for its consideration as part of the proposed programme budget for the biennium 2018-2019 (A/72/6 (Sect. 35)).

## II. The policy context in which the Development Account operates

4. Following the global review and consultations on the progress towards achieving the aspirations of the Millennium Declaration, including the United Nations Conference on Sustainable Development in 2012, the Millennium Development Goals were brought to a close in 2015. Building on the successes and lessons learned from the Millennium Development Goals and seeking to address their unfinished business, the international community adopted the much more ambitious 2030 Agenda for Sustainable Development (General Assembly resolution 70/1) with its comprehensive, far-reaching and people-centred Sustainable Development Goals and targets.

5. The new Agenda and its Goals and targets encompass a much broader and interconnected spectrum of issues across the three dimensions of sustainable development (economic, social and environmental) aimed at achieving a prosperous, peaceful, sustainable and equitable world. “Leave no one behind” is the central promise of this new vision, which pledges to address the multidimensional causes of poverty, inequality and discrimination and reduce the vulnerability of the most marginalized. Implementing this new vision calls for the adoption of new, more integrated, strategic and collaborative approaches by both Member States and the development community to address the complex and interrelated challenges of

---

<sup>1</sup> See [A/57/7/Add.5](#) and [A/58/7/Add.1-30](#).

sustainable development. This, in turn, requires increased capacities to formulate and implement such approaches.

6. The 2030 Agenda for Sustainable Development has identified capacity development as a key element for the implementation of sustainable development and has stressed the importance of United Nations system support in that regard. In the 2016 quadrennial comprehensive policy review of operation activities for development of the United Nations system (General Assembly resolution [71/243](#)), the importance of capacity development to achieve internationally agreed development goals was further reiterated and the United Nations system was called upon to support national efforts in that connection. In particular, the United Nations development system was requested to provide upstream, evidence-based policy and institutional support. The Development Account and its 10 implementing entities are uniquely positioned to do so, placed at the intersection of the global policy framework and implementation at the national level.

7. The reporting period also saw the adoption of the Addis Ababa Action Agenda of the Third International Conference on Financing for Development (General Assembly resolution [69/313](#)), which further reaffirmed the commitment to capacity development and the means of implementation to address the challenge of financing sustainable development, and the adoption of the Paris Agreement on the global response to the threat of climate change.

### III. Overview and achievements

8. The eighth tranche of the Development Account was brought to a successful close during the period covered by the present report. It comprised a total of 50 active projects.<sup>2</sup> Thirty-nine of the projects were funded from the programme budget for the biennium 2012-2013 (General Assembly resolution [66/248 A](#)) and 11 were funded from additional funds appropriated through Assembly resolution [66/246](#).

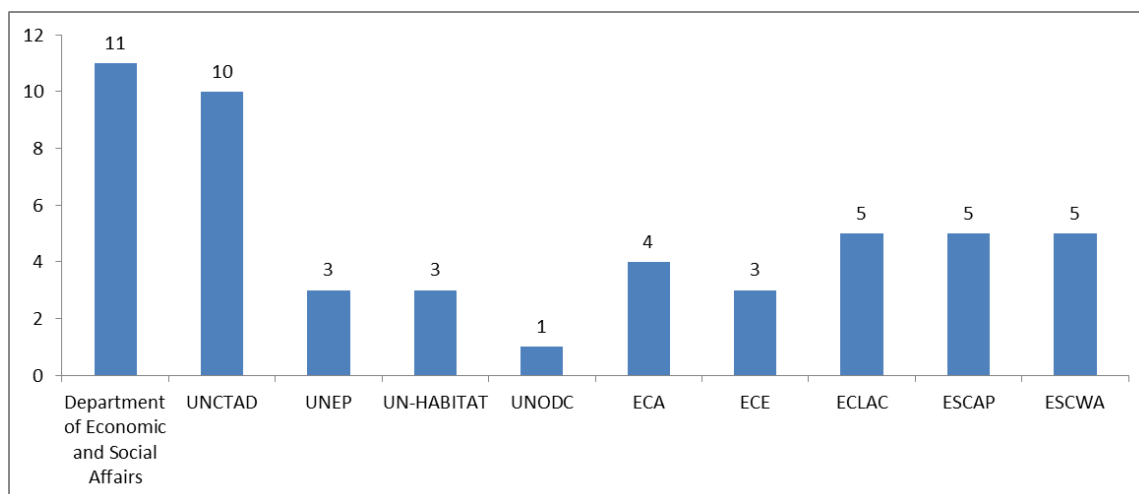

9. The tranche was launched in the wake of the 2010 High-level Plenary Meeting of the General Assembly on the Millennium Development Goals under the general theme “Supporting Member States to accelerate progress towards achieving the internationally agreed development goals, including the Millennium Development Goals, in the context of the multiple and interrelated development challenges”.

10. The eighth tranche projects sought to make available the full range of normative and analytical expertise and the comparative advantages of the implementing entities to beneficiary countries. Through funding from the Account, the mostly non-resident implementing entities were able to operationalize their vast knowledge and know-how and deliver capacity development assistance on the ground. The eighth tranche projects were developed in direct response to requests from beneficiary countries. As illustrated in figure I, the eighth tranche featured projects delivered by all 10 Development Account implementing entities. A total of 28 projects were implemented by the five global entities of the Account and the remaining 22 projects were executed by the five United Nations regional commissions.

---

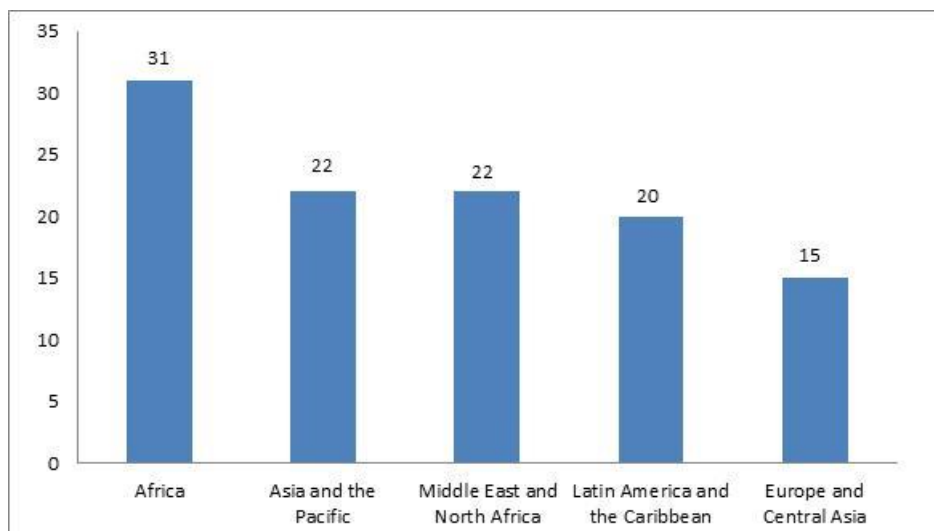

<sup>2</sup> At the time of writing, final and evaluation reports were available for 42 projects. Together with the project documents and project progress reports for the eighth tranche projects, they provided the main source of information for the analysis of the eighth tranche in the present report.

Figure I  
Eighth tranche projects, by implementing entity

11. The eighth tranche projects supported capacity development in all the major developing regions of the globe (see figure II). In terms of the number of projects, Africa was the region that received the most prominent support from the eighth tranche, with close to a third of all projects including at least one country in Africa among its beneficiaries. Approximately two fifths of the projects included at least one beneficiary country from Asia and the Pacific, the Middle East and North Africa, and Latin America and the Caribbean regions, and a third of the projects included at least one beneficiary country from Europe and Central Asia.

Figure II  
Regional distribution of eighth tranche projects\*

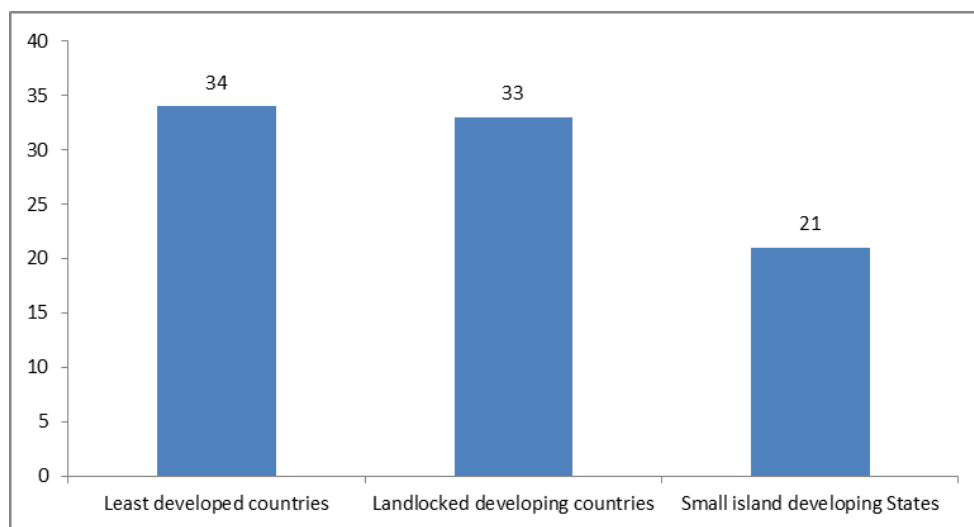

\* Several projects simultaneously support countries in different regions of the world. The sum of the figures in the above graph therefore exceeds the total number of eighth tranche projects.

12. The implementation of the eighth tranche projects contributed to capacity development in as many as 132 developing countries and 17 countries with economies in transition across different parts of the world. This includes both

countries that were direct targets of the projects and beneficiary countries that benefited from the outputs or deliverables emanating from the projects.

13. While the eighth tranche projects focused on providing capacity development support to developing countries in general, particular attention and efforts were paid to countries with special needs, namely, the least developed countries, landlocked developing countries and small island developing States. As highlighted in figure III, approximately two thirds of the projects provided capacity development support to least developed countries and landlocked developing countries and two fifths of the projects provided the same support to small island developing States.

Figure III  
**Eighth tranche projects focusing on countries with special needs\***

\* Many projects simultaneously support countries in several different categories. The sum of the figures provided, therefore, exceeds the total number of eighth tranche projects.

#### Box 1

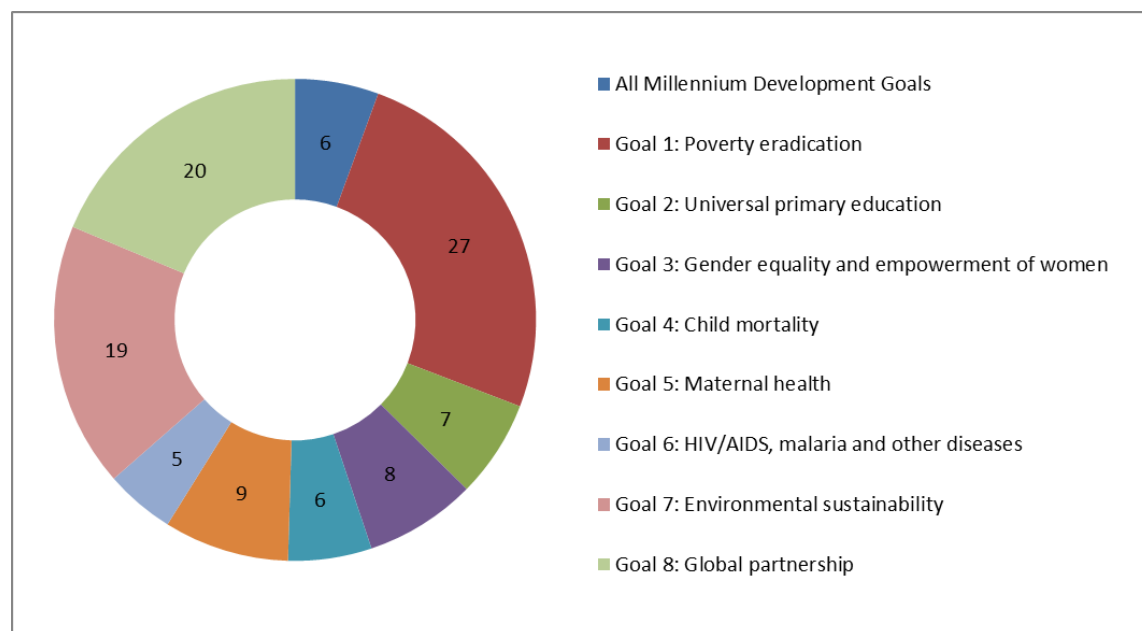

##### **Least developed countries and small island developing States**

The programming of the eighth tranche of the Development Account followed the Fourth United Nations Conference on the Least Developed Countries, at which the Programme of Action for the Least Developed Countries for the Decade 2011-2020 (Istanbul Programme of Action) was adopted. Four of the eighth tranche projects focused solely on least developed countries, with an additional 30 projects including at least one least developed country among its beneficiaries. These projects contributed to the overarching goal of the Programme of Action to overcome the structural challenges faced by least developed countries in order to eradicate poverty, achieve internationally agreed development goals and enable graduation from the least developed country category. The eighth tranche also included 33 countries in the landlocked developing country category among its beneficiaries, with each landlocked developing country benefiting from an average of six projects. Twenty-one of the eighth tranche projects also included at least one small island developing State among its beneficiaries, with one eighth tranche project focusing exclusively on small island developing States and increasing their resilience against climate change (the United Nations Human Settlements Programme (UN-Habitat) project “Capacity development to increase the resilience of Asian and Pacific cities to climate change (1213AU)”). These projects supported the SIDS Accelerated Modalities of Action (SAMOA) Pathway (General Assembly resolution 69/15).

14. In line with the general theme of the tranche, all eighth tranche projects contributed towards the achievement of the Millennium Development Goals. As illustrated in figure IV, Goal 1 (eradicate extreme hunger and poverty), Goal 8 (develop a global partnership for development) and Goal 7 (ensure environmental sustainability) were the three most frequently supported Goals. All the Goals, covering all three pillars of sustainable development, were, however, supported through the delivery of the projects, as illustrated in figure IV.

Figure IV

**Number of eighth tranche projects supporting the different Millennium Development Goals \***

\* Several projects simultaneously support more than one Millennium Development Goal. The sum of the figures in the above graph therefore exceeds the total number of eighth tranche projects.

15. The eighth tranche projects provided capacity development assistance to project beneficiary countries through various means. Project deliverables included some 270 national workshops and more than 150 subregional/regional/interregional workshops. Deliverables also included study tours to promote North-South and South-South cooperation during the course of the implementation of three projects.

16. In addition, the implementation of the eighth tranche projects led to the development of various analytical products that were utilized in the projects during implementation or delivered as end products to the project beneficiaries: (a) 120 country/case/subregional/global studies; (b) 23 briefs; (c) 19 reports; and (d) 6 publications.

17. Thirty projects included the development of tools, toolkits, methodologies, models, guides, manuals and innovative practices among their outputs. Fourteen projects produced a total of 44 training courses or modules for the benefit of Member States. Platforms, networks and committees at various levels were also developed and utilized under 23 projects.

18. Twenty-two projects provided assistance to Member States in their policymaking efforts at different levels, ranging from supporting the drafting of strategies to the implementation of laws. This included: (a) 79 national action plans; (b) 29 policy recommendations/notes; (c) 14 policy proposals; (d) 14 policy actions; and (e) 4 policy documents.

19. The full range of the results achieved through projects are often not immediately apparent, however, at the close of their implementation. The extent of the impact may only become evident some time thereafter. In the description of Development Account project achievements in different areas under the three pillars of sustainable development set out below, the scope of reporting has therefore been extended beyond the eighth tranche to cover a broader range of projects from previous tranches.

### **Economic pillar**

20. In the past 10 years, the Department of Economic and Social Affairs has transferred, through several Development Account-supported projects, economy-wide and energy modelling tools and the required capacity to use them for policy analysis to 22 countries in Latin America, the Middle East and North Africa, Asia and Africa. The projects have influenced the way governments think about the feasibility of different policies using evidence from rigorous modelling analyses that integrate the economic and social dimensions of development and energy planning. The use of the models by government experts has helped to sharpen thinking on development policies and encouraged policy dialogue. There is now more awareness about the fact that any development policy needs to be assessed in the light of the real macroeconomic and financing feasibility of implementing the policy. Economy-wide models inform the design and the implementation of national development plans, including in energy planning, given that they help to detect the trade-offs and synergies of policies flowing through all sectors of a socioeconomic system.

21. The availability and utilization of quality statistical information are key for evidence-based policy formulation and tracking progress towards the achievement of national and international development targets. With the support of the Development Account, ECA has helped to strengthen the capacity of Member States to collect and produce high-quality data on civil registration and vital statistics in the Africa region. Activities implemented in Africa have fed into the Africa Programme on Accelerated Improvement of Civil Registration and Vital Statistics Systems and have helped to harness political commitment for improvement of the systems at the highest level of governments through the Conference of African Ministers responsible for Civil Registration, promoted country ownership and leadership as well as systematic and coordinated approaches at the regional and country levels, built the capacity of civil registration and vital statistics officials and facilitated the sharing of knowledge and experiences among countries. ECA has, with the support of the Development Account, also helped to strengthen the capacity of African countries to use mobile technology to collect data for effective policymaking and decision-making. The beneficiary countries have developed in-house capacity and gained skills to use mobile technology in data collection.

22. Through Development Account projects, UNCTAD has helped to strengthen science, technology and innovation policies in Africa, Latin America and Asia and supported the capacities of developing countries to design, implement and evaluate their science, technology and innovation policies. Through the projects, UNCTAD has increased the level of awareness and understanding among policymakers, academics and businesses about innovation policy; provided independent and sound advice on how to integrate national science, technology and innovation policies into national development strategies; identified priorities for strengthening national science, technology and innovation capacities; and strengthened the capacities of public officials and other key stakeholders from 18 countries to design, implement and evaluate science, technology and innovation policies. Policymakers from other non-project developing countries have also benefited from the policy analysis and recommendations.

23. UNCTAD has also supported strengthening the capacity of developing country academics to conduct policy-oriented teaching and research on trade and development issues through Development Account projects in support of its Virtual Institute. The projects have helped to consolidate the role of academic institutions in fostering evidence-based policymaking in developing and transition countries. They have also resulted in an increase in the quantity and the enhancement of the quality of postgraduate teaching and relevant research at participating universities. Drawing on the Virtual Institute's online competencies and university contacts, the projects have provided sophisticated postgraduate economics training and high-level original research, which have resulted in the strengthening of the capacities of developing and transition country researchers to undertake policy-relevant research on the impact of trade on poverty in their countries. The projects have also contributed to increased researcher-policymaker cooperation and ensured that the research outputs completed are policy-relevant for the participating countries. With the support of the Account, the number of academic institutions that are members of the Virtual Institute has grown to 131 institutions from 64 countries around the world. Some 1,350 staff from beneficiary universities use the Virtual Institute website to access teaching resources and for knowledge-sharing. The teaching materials produced have been used in the preparation of courses or as background reading in teaching nearly 15,500 students. More than 100 researchers around the world have acquired new skills on trade and poverty research methods through an online course, and 11 policy-relevant trade and poverty studies have been completed by participating researchers in cooperation with national policymakers from the African, Asian and European regions.

24. Cumbersome trade procedures discourage economic activity and make it difficult for the private sector and countries to participate in regional and global production networks. With the support of the Development Account, ESCAP has assisted countries in the region with enhancing their capacity to develop and implement cross-border paperless trade facilitation measures that help to simplify processes and regulations, reduce trade costs and boost trade in the Asia-Pacific region.

25. Similarly, ECE has supported the capacity of transition and developing economies to implement international standards for commercial agricultural products to improve their trade competitiveness and has organized capacity-building activities in Central Asian countries to increase their opportunities in international trade. These activities have made it possible to work towards the pooling of production resources and increase business and export potential, as well as open new markets and provide prospects for the sustainable economic and social development of the region.

26. The Department of Economic and Social Affairs has worked on strengthening the capacity of national tax administrations in Latin America to reduce tax transaction costs and maximize tax revenue through rationalizing the management and simplifying the operation of tax systems. With the assistance of the Development Account, a methodology to measure tax transaction costs has been developed to allow for an assessment of different cost areas, in order to identify measures to reduce such costs and, as a result, increase tax revenue available to governments for investment in sustainable development. In addition to pilot countries, several other countries in Latin America have committed to assessing tax transaction costs by using the methodology developed, with a view to identifying effective measures to reduce such costs.

### Social pillar

27. UNODC has promoted the rule of law and governance in the criminal justice system in Africa. UNODC assistance has helped to improve the availability and quality of justice for the accused by supporting the building of legal aid capacity and infrastructure and enhancing coordination and synergy among key actors that support and oversee the courts. Through those efforts, UNODC has improved the quality of legal representation and enhanced compliance with the right to a fair trial. Building on those successes, UNODC has proposed a new project, under the eleventh tranche of the Development Account, on improving access to legal aid for women in Western and Central Africa.

#### Box 2

#### Gender-responsive capacity development

The capacity development focus of Development Account projects spans a wide array of areas covering economic and social affairs, trade, sustainable development, human settlements, and drugs and crime. An important cross-cutting concern is how men and women are affected differently by the issues that the projects address. The consideration of differentiated needs and addressing identified gender inequalities are an important dimension of the Development Account. Four eighth tranche projects in particular focused on this issue: (a) UN-Habitat: Strengthening the capacities of the member States of the International Conference on the Great Lakes Region to address the land and property issues of internally displaced persons and refugees, with a specific emphasis on women's land and property rights (*I213T*); (b) ESCAP: Interregional cooperation to strengthen national capacities to measure progress in achieving gender equality and women's empowerment (*I213AI*); (c) ESCWA: Institutional and capacity-building project for Arab parliaments and other stakeholders for the implementation of Security Council resolution [1325 \(2000\)](#) on women and peace and security (*I213AK*); and (d) ECA: Capacity-building on agribusiness for women to enhance food security in Eastern Africa (*I213AV*).

### Environmental pillar

28. The implementing entities of the Development Account have also supported capacity development in various areas under the environmental pillar of sustainable development. UNEP has, for example, implemented capacity-building projects on resource management and ecosystems-based adaptation in several African countries. Through those projects, environmental issues have been integrated into economic and agricultural policies and plans. The impact and sustainability of the projects, however, go well beyond national legislation and policies that have enhanced food security and water supply. They have also addressed income security and disaster risk reduction and facilitated innovative partnerships across sectors.

29. The science and policy interface to manage complex disaster risks is key for the inclusion of resilience in the sustainable development agenda. Supported by the Development Account, ESCAP has developed risk assessment tools and guidelines to systematically assess how complex global climate phenomena can affect vulnerable communities and to quantify impacts of climate phenomena on sustainable development in the region. Utilizing these risk assessment tools and guidelines as a part of regional and national strategies to build resilience and mitigate future impacts in the Asia-Pacific contributes to the achievement of the Sustainable Development Goals.

30. With support from the Development Account, UN-Habitat has further kick-started an urban climate change resilience programme focusing on the capacity development of local authorities and other key urban stakeholders in the Pacific. The capacity development assistance provided to one government has resulted in the development of an urban resilience and climate action plan. Based on the plan, a pilot initiative that supports two informal settlement communities in developing resilient water and sanitation facilities as prioritized by the communities is now being funded by a donor government.

31. ECE has promoted the importance of sustainable forest management as a tool to strengthen low-carbon, resource-efficient and socially inclusive green economies in the Caucasus and Central Asia. ECE is continuing those efforts through an ongoing project aimed at strengthening the national capacity of countries in the Caucasus and Central Asia to develop accountability systems for sustainable forest management. The efforts of ECE have led to positive changes in the development of sustainable forest management policies aligned with green economy principles, including the development and adoption of national action plans for the forest sector and the development of a reform concept of the forest management system in accordance with a green economy.

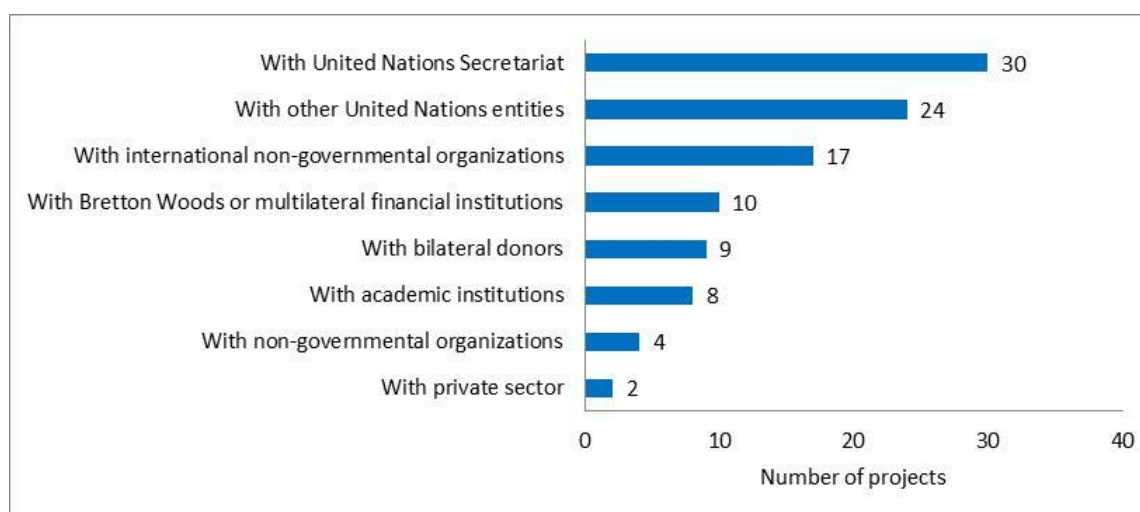

32. ECLAC has sought to improve the national capacities of Latin American and Caribbean export sectors to meet the challenges and exploit new opportunities arising from the increasing spread of climate change regulations in international trade and to exploit those opportunities to enhance the competitiveness of small and medium-sized enterprises in international markets. The efforts by ECLAC have succeeded in filling persistent information gaps in the participating countries, in particular among agricultural producers and exporters directly affected by carbon footprint initiatives in their destination markets. Trade sustainability criteria and export-product carbon footprint calculation and mitigation have, for the first time, been introduced in several of the participating countries. Some 22,000 producers have indirectly benefited from such activities. The direct involvement with multiple stakeholders, together with an effective approach at the enterprise level and emphasis on the development of public-private partnerships, has inspired several recent initiatives across Latin America.

33. ECLAC has also provided assistance in strengthening national capacities to design and implement sustainable energy policies for the production and use of biofuels and to address the issue of weak institutional and technical capacity of governments in the Latin America and the Caribbean region to deploy and implement effective evidence-based energy efficiency policies and programmes at the national level, with particular attention to policies on innovation. Specifically, those efforts have contributed to creating an enabling environment for sustainable energy policies at the national and regional levels. They have helped to improve national capacities to compile disaggregated demographic, economic, activity-level and energy consumption data in order to calculate energy efficiency indicators at the sectoral levels; increased knowledge regarding the link between economic activity and energy consumption; and enhanced the capacity of governments to promote policymaking based on data and indicators. In addition, they have further raised awareness of the need for a multisectoral approach to energy planning and introduced the Long-range Energy Alternatives Planning System (LEAP) model as a tool for cross-sectoral policy debate. Such initiatives have supported the ability of Latin American and Caribbean countries to establish sustainable energy policies, legislation or planning outcomes for the production and use of biofuels.

### Partnerships, leveraging and multiplier effects

34. A key component of the Development Account implementation strategy is encouraging implementing entities to build and deliver projects in partnerships with entities from both within and beyond the United Nations system. Successful partnerships allow projects to draw on the knowledge and know-how available in the collaborating entities and avail project beneficiary countries of the expertise available in those entities. Partnerships have the potential to enhance the sustainability and potential impact of projects by facilitating the continuation of cooperation between project-collaborating entities and counterparts in the beneficiary countries beyond the time frame of the project. Almost all eighth tranche projects were implemented as collaborative efforts with key partners, with both organizations from within and outside the United Nations system providing important contributions (see figure V).

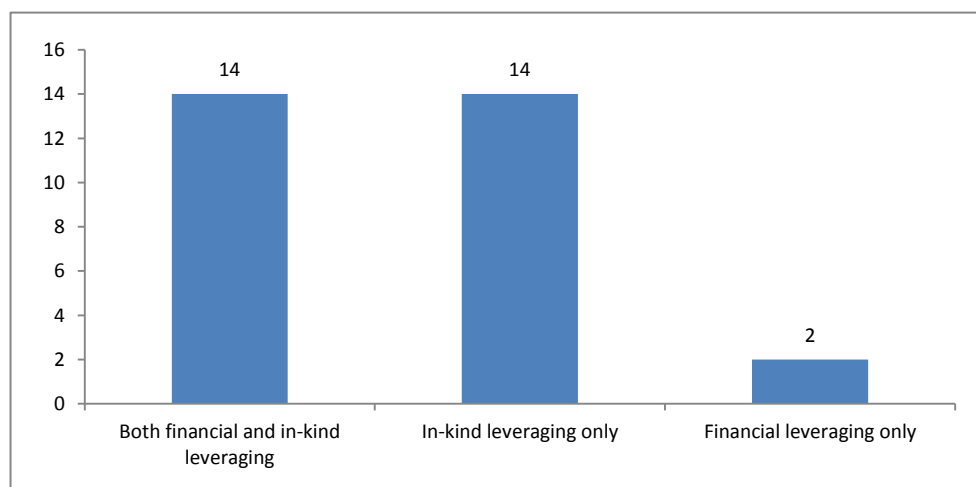

Figure V  
Eighth tranche project partnerships\*

\* Several projects engaged in partnerships with more than one category of partners. The sum of the figures in the above graph therefore exceeds the total number of eighth tranche projects.

35. Almost two thirds of eighth tranche projects received additional resources from external sources. A third of the projects received in-kind support such as logistical support, travel and accommodation arrangements for workshop participants, provision of speakers and experts to support the delivery of workshops, and workshop venues. A tenth of the projects were further supported financially, through external resources. A third of the projects benefited from both financial and in-kind external support.

Figure VI  
Eighth tranche project leveraging

36. The reach of several eighth tranche projects was extended beyond their original design through various multiplier effects. At least 52 additional countries other than the initially selected target countries benefited from seven projects. Thirteen projects further resulted in requests for additional technical and advisory assistance, studies and training from project beneficiary and non-beneficiary countries. Eleven projects generated follow-up activities by the beneficiary countries themselves after their close. Thirty-eight new follow-up projects to continue or expand on the activities of nine projects implemented under the eighth tranche are, furthermore, in the pipeline or have already been launched. Three non-project governments have committed to replicating the delivery of three projects in their countries.

#### **Building on achievements to support the 2030 Agenda for Sustainable Development**

37. Building on the experience and the achievements of past tranches, the projects proposed for the eleventh tranche of the Account have been developed under the general theme “Supporting Member States in strengthening evidence-based policy coherence, integration and participatory implementation of the 2030 Agenda at all levels”. The Account and its implementing entities are well positioned and stand ready to continue to actively support Member States in areas of their priority needs through the delivery of the projects proposed for the eleventh tranche and to contribute to the achievement of the Sustainable Development Goals and the central promise of the 2030 Agenda of providing inclusive development for all and leaving no one behind. All eleventh tranche projects have clear links to achieving specific Sustainable Development Goal targets.<sup>3</sup>

<sup>3</sup> See also the 46 new eleventh tranche projects being presented to the General Assembly for its consideration as part of the proposed programme budget for the biennium 2018-2019 ([A/72/6 \(Sect. 35\)](#)).

## Box 3

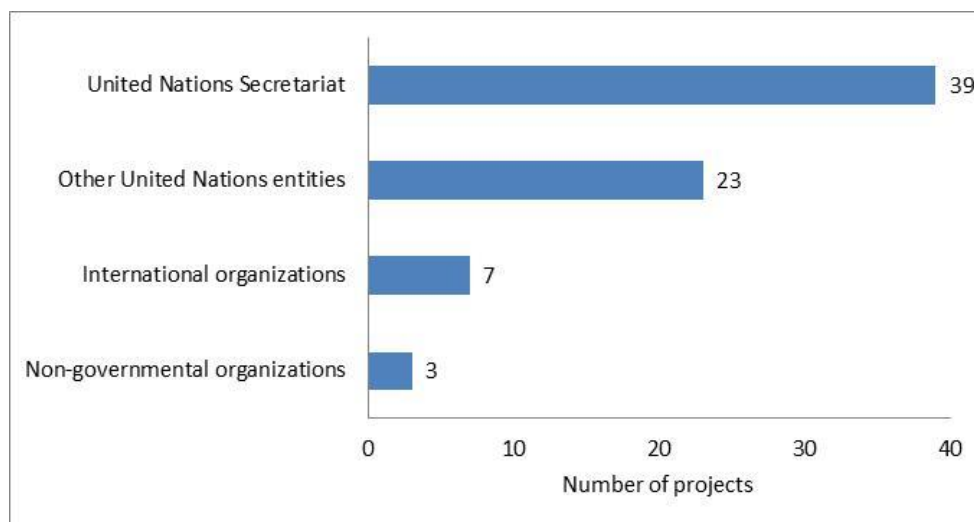

**No one left behind**

While leaving no one behind is at the forefront of the 2030 Agenda, the Development Account has a history of supporting those left the furthest behind. Nine eighth tranche projects addressed the needs and rights of at least one vulnerable group. Among the key beneficiaries were children, young people, persons with disabilities, older people, refugees, internally displaced persons, migrants and the poor. Two eighth tranche projects focused specifically on inclusion and the rights of vulnerable groups. The ECLAC project “Time for equality: Strengthening the institutional framework of social policies (1213AE)”, which was implemented in collaboration with ESCAP and ESCWA, promoted social protection policies in Latin America and the Caribbean, East Asia and the Pacific, and Western Asia. The UN-Habitat project “Strengthening the capacities of the member States of the International Conference on the Great Lakes Region to address the land and property issues of internally displaced persons and refugees, with a specific emphasis on women’s land and property rights (1213T)” further considered the rights of the refugees and internally displaced people with a focus on women and young people.

#### IV. Managing the Development Account for results

38. The 2030 Agenda places a strong emphasis on partnerships and collaboration. With the eleventh tranche, the Development Account reached a milestone, with 96 per cent of the proposed projects foreseen to be implemented in partnerships with other entities from the United Nations system. This exceeds the percentage in previous tranches. Many of the eleventh tranche projects will be implemented jointly among several entities, including projects on illicit financial flows, migration, geospatial data, graduation and environment.

Figure VII

**Eleventh tranche project partnerships\***

\* Several projects engaged in partnerships with more than one category of partners. The sum of the figures in the above graph therefore exceeds the total number of eleventh tranche projects.

39. A prime example of Development Account partnerships is the \$10 million programme for statistics and data to enhance the statistical capacities of Member States, which is being jointly implemented, in true “Delivering as one” fashion, by all 10 implementing entities of the Account under its tenth tranche.

40. An important achievement during the reporting period was the streamlining of procedures for quality assurance and design of Development Account projects. The time period between General Assembly approval of the resources for the Development Account for the biennium and the start of project implementation has been reduced significantly over the past two tranches. With the eleventh tranche, the Development Account team intends to work on further reducing this time period, with the aim of having project documents finalized before the end of 2017 and most projects allotted by early 2018.

41. During the 2018-2019 biennium, the Development Account team will continue to review and provide oversight to 148 projects as follows: (a) 46 projects of the eleventh tranche will be programmed, requiring a review of project documents and issuance of allotments; (b) the twelfth tranche will be launched, requiring the review of 45 to 50 project concept notes, in addition to the preparation of the budget fascicle; (c) 59 ninth tranche and 43 tenth tranche projects will need to be actively monitored, requiring regular consultation with the implementing entities and the review of the year end progress reports; and (d) final reports and evaluation reports for 59 ninth tranche projects will need to be reviewed and assessed to take stock of project achievements and challenges and to prepare the eleventh progress report to the General Assembly.

42. A new public website for the Development Account ([www.un.org/development/desa/da/](http://www.un.org/development/desa/da/)) was launched during the reporting period to increase transparency and the sharing of information with implementing partners and Member States. The website features up-to-date information and includes dynamic pages allowing for easier browsing of all projects by different criteria.

43. Building on an updated project document database that was developed during the reporting period, the Development Account team is launching a knowledge management platform that will allow all implementing entities to have access to relevant project documents from current and past tranches and to share knowledge and lessons learned.

44. Project evaluations are an essential part of the programming cycle of the Development Account. Lessons learned distilled from the evaluations are used in the design of new projects and to prepare the progress report to the General Assembly. Since the fourth tranche of the Account, mandatory end-of-project external evaluations are required, with 2 per cent of the total project envelope allocated for that purpose. To date, a total of 170 projects have been evaluated. The Development Account team will engage with the Development Account Network to review the evaluation process and ensure that these funds are used in the most efficient and effective way and that more programme-level results can be distilled, reported on and disseminated through the knowledge management network.

## V. Summary and conclusions

**45. The Development Account is an important funding mechanism for enabling the 10 United Nations Secretariat implementing entities to operationalize their normative and analytical expertise and deliver demand-driven projects to assist developing countries in achieving the 2030 Agenda for**

**Sustainable Development. The projects are implemented in collaboration with relevant partners both within and beyond the United Nations system.**

**46. The reporting period saw the launch of the tenth tranche of the Account and the programming of projects financed from the residual balances of the seventh tranche. The reporting period also saw the eighth tranche of the Account being successfully brought to a close.**

**47. An important next step will be to ensure that the project documents of the eleventh tranche are prepared and reviewed in a timely manner and that the allotments are issued during the first quarter of 2018. All eleventh tranche projects have clear links to specific Sustainable Development Goal targets.**

**48. The General Assembly may wish to take note of the present report.**

## Annex I

## Summary of Development Account tranches as at 31 May 2017

<i>Biennium</i>	<i>Theme</i>	<i>Tranche</i>	<i>Approved (thousands of United dollars)</i>	<i>General Assembly resolution</i>	<i>Total number of projects</i>	<i>Number of active projects</i>	<i>Implementation period</i>	<i>Status as at 31 May 2017 (percentage)</i>
1998-1999	Support for the implementation of global conferences	1	13 065.00	53/220 A	7	–	–	Closed
2000-2001	Networking and regional and subregional expertise	2	13 065.00	54/249	16	–	–	Closed
2002-2003	Capacity-building for managing globalization	3	13 065.00	56/254 A	20	–	–	Closed
2004-2005	Capacity-building for Millennium Development Goals through partnerships, knowledge-management and taking advantage of information and communications technologies	4	13 065.00	58/270	23	–	–	Closed
2006-2007	Supporting progress towards the internationally agreed development goals, through knowledge-management, networking and partnerships	5	13 065.00	60/247	24	–	–	Closed
		5A	3 415.90	60/246 and 61/252	6	–	–	Closed
		5B	5 071.00	62/235	10	–	–	Closed
2008-2009	Supporting progress towards achieving internationally agreed development goals, through innovation, networking and knowledge-management	6	16 480.90	62/237	27	–	–	Closed
		6A	2 170.40	62/236, 62/237 and 62/238	5	–	–	Closed
		6B	7 500.00	64/242 A	15	–	–	Closed
2010-2011	Support to addressing key global development challenges to further the achievement of internationally agreed development goals, through collaboration at the global, regional and national levels	7	18 651.30	64/244 A	28	–	–	Closed

2018-2019	Supporting Member States in strengthening evidence-based policy coherence, integration and participatory implementation of the 2030 Agenda for Sustainable Development at all levels	11	28 398.80	Proposed programme budget for the biennium 2018-2019 (A/72/6 (Sect. 35))	46	–	2018-2021	
<b>Grand total</b>			<b>238 054.10<sup>b</sup></b>		<b>404</b>	<b>102</b>		

<sup>a</sup> Two projects originally envisioned for the eighth tranche were not implemented. The residual funds from the two projects will, in accordance with General Assembly resolution 56/237, be redeployed to forthcoming projects that can deliver better results.

<sup>b</sup> Excludes \$4,000,000 representing the residual balance from tranches 1 to 4 that was programmed in the context of the seventh tranche, \$7,113,000 representing the residual balance from tranches 5 and 6 that was programmed in the context of the ninth tranche, and \$5,658,408 representing the residual balance from tranche 7 that was programmed in the context of the tenth tranche.

## Annex II

## Update on the status of the ninth and tenth tranches: implementation rates

Table A.1

**Projects funded from section 35, Development Account, of the programme budget for the biennium 2014-2015 (ninth tranche) as at 31 May 2017**

<i>Project title</i>	<i>Implementing entity</i>	<i>Approved (A)</i>	<i>Expenditures (B)</i>	<i>Implementation rate (percentage)</i>
		<i>(Thousands of United States dollars)</i>	<i>(Thousands of United States dollars)</i>	<i>[(B)/(A)]</i>
A Strengthening the capacity of national tax administrations in developing countries to effectively negotiate and apply double tax treaties for the financing of sustainable development	DESA	632.0	567.9	90
B Supporting Member States in developing and strengthening environment statistics and integrated environmental-economic accounting for improved monitoring of sustainable development	DESA	691.0	411.7	60
C Strengthening the capacity of small island developing States to assess progress in the implementation of the Mauritius Strategy to mitigate risks and reduce vulnerability	DESA	588.0	323.8	55
D Supporting developing countries in their transition from Millennium Development Goals-based development strategies to broader sustainable development strategies through modelling-based policy analyses	DESA	630.0	429.1	68
E Enhancing the capacity of Governments and indigenous leaders to ensure social integration and inclusive development in Africa and Asia	DESA	524.0	238.9	46
F Strengthening the capacities of developing countries in sub-Saharan Africa to effectively produce and use population data in policymaking for sustainable development	DESA	588.0	264.6	45
G Data collection methodology and tools for supporting the formulation of evidence-based policies in response to the challenge of population ageing in sub-Saharan Africa	DESA	395.8	295.0	75
H Strengthening the capacities of developing countries to provide access to development information through open government data	DESA	592.0	530.1	90
I Monitoring and reporting on sustainable development objectives, goals and targets: enhancing institutional capability in selected developing countries	DESA	639.0	280.1	44
J Strengthening national capacities to develop national action plans to implement the non-legally binding instrument on all types of forests	DESA	413.0	185.9	45
K Building the capacity of policymakers in developing countries to address regulatory and institutional gaps in the field of sovereign debt governance	UNCTAD	588.0	266.9	45
L Supporting Member States in developing and launching sustainable product export strategies through national sustainable product export reviews	UNCTAD	590.0	314.0	53
M Building the capacities of selected least developed countries to upgrade and diversify their fish exports	UNCTAD	596.0	425.8	71

	<i>Project title</i>	<i>Implementing entity</i>	<i>Approved (A)</i> <i>(Thousands of United States dollars)</i>	<i>Expenditures (B)</i>	<i>Implementation</i> <i>rate (percentage)</i> <i>[(B)/(A)]</i>
N	Strengthening the capacities of policymakers to assess the implications of non-tariff measures in international trade and formulate appropriate policy responses	UNCTAD	620.0	230.5	37
O	Climate change impacts on coastal transport infrastructure in the Caribbean: enhancing the adaptive capacity of small island developing States	UNCTAD	595.0	294.4	49
P	Strengthening the capacity of the States members of the Economic Community of Central African States to enhance domestic production linkages with the mineral resources sector	UNCTAD	641.0	395.8	62
Q	Building the capacities of developing countries to shift towards sustainable freight transport	UNCTAD	611.0	276.6	45
R	Strengthening the capacities of policymakers in developing countries and investment promotion officials in priority sectors to attract investment for sustainable and inclusive development	UNCTAD	585.0	201.9	35
